Average cocaine prevalence in population between 2003-2020

Distribution across continents in 2020

Africa
4.66%

Americas
29.81%

Oceania
47.45%

Asia
1.16%

Europe
16.92%
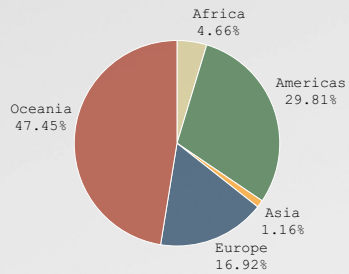

The prevalence of drug use in the reference population is the proportion of the reference population that have consumed the drug of concern at least once during the specified reference period prior to the time of observation. The annual prevalence refers to the drug use at least once in the last 12 months

Countries with the highest cocaine prevalence

|			
Australia 2.56%	Spain 2.32%	Ireland 1.78%	Netherlands 1.77%
Scotland 2.41%	United States of America 2.31%	Northern Ireland 1.73%	
United Kingdom (England and Wales) 2.38%	Uruguay 1.93%	Canada 1.47%	

Cocaine prevalence in Europe
